Can Carida, Cala Tarida
€2.700.000

Behind a curtain of foliage in Cala Tarida, your private sanctuary awaits. Nestled into a luscious, tree-lined plot, Can Carida's dramatic sculptural frame transcends architecture, with its whitewashed form creating a bold outline across the Balearic blue skies. An exemplar of light-touch, pared-back design, the surrounding nature graciously shares its stage.

This equilibrium provides balance and tranquillity. It is masterfully maintained within, where floor-to-ceiling glazing spans the width of the ground floor, flooding the open-plan kitchen and living room with natural light. The kitchen's waterfall marble countertop echoes the exterior architecture while providing ample seating. Sliding glass doors invite the sheltered terrace to expand the living space while an integrated sound system is ideal for relaxing or entertaining.

Stepping stones lead across the lawn towards a leafy terrace, featuring a Japanese tree. Take dips in the expansive pool, before an alfresco meal under the covered dining area. Its olive-green cabinetry and stone walls pay homage to rustic, Ibizcan materiality.

Heading back to the villa, the black-framed glass doors at ground level are mirrored on the outside – providing privacy to those inside. The contemporary and calming interior living space is arranged over three floors. One bedroom sits on the ground floor while at basement level, the plan unfurls revealing two bedrooms illuminated by a large light well. Palatial proportions continue to the first floor where two further ensuite bedrooms are located.

Bringing the outside in, the first-floor principal bedroom features floor-to-ceiling glazing. Integrated wardrobes ensure seamless flow while a pared-back ensuite features a twin vanity and frameless shower. Stepping outside onto the expansive roof terrace, views stretch from the landscaped garden and Cala Tarida, across Cala Corral and out to sea.

A striking yet tranquil family home, Can Carida provides the best of both worlds. Amongst palm trees and framed by pine-covered mountains, its idyllic setting complements its architectural innovation.
